

Plug-In Kit

Optional Accessory

Product No.: PLUG

Price: \$16.00

DESCRIPTION

All of our wall mounted lights are setup for hardwired application. But, we can convert any of our hardwired wall mounted lights to be wired using a cord with a plug. Please note that when we add this option to an exterior fixture, it will instantly change it to an interior/dry location only.

When ordering this kit please specify which fixture you intend to use it on and we will install it prior to shipping.

Whats included: A 8' brown or black cord with a two prong plug, a mounting plate and hardware to secure your fixture to the wall without the need for a junction box. If, the fixture does not come with a switch already installed, we will use a cord that has a built in switch on those select fixtures.
